

HANDLE ADJUSTMENT

1 The handle on the Mega Herc needs to be adjusted when you receive your cart. For shipping purposes, it arrives in a lowered position to reduce the overall height.

2 You will see four bolt sets that have not been tightened down.

3 You should be able to remove them by hand. However if needed, you can use a 3/4" wrench and socket.

4 We recommend that you slide the handle up to the top two sets of holes. However, you can put the handle at the level that best suits your needs (72" or 66" High)

5 Align the handle over the holes and insert the bolts and washers to hold it in place.

6 Install a washer and nut onto the bolt and tighten down using a 3/4" wrench and socket.

HANDLE ADJUSTMENT

Your handle is now correctly installed and your Mega Herc is ready for use.
