

## QUICK START GUIDE

1

INSPECT

Upon receiving the shipment it is the customer's responsibility to inspect the shipment **BEFORE** signing the release of liability. Make sure to note any damage on the release.

Contact Granite immediately if you have any questions regarding a damaged delivery:  
**877-447-2648**

Once the release is signed, Granite cannot be held liable for any shipping damages or missing items.

2

UNPACK

A hammer and/or crowbar are helpful to remove the portions of the crate that are nailed together.

3

FIRST USE

To power your cart on, pull the red On/Off switch out towards you. The lights on the right handle should light up when the cart is powered on.

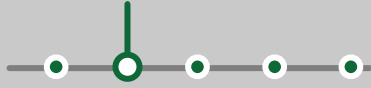

Make sure the black toggle switch to the left of the On/Off switch is in the forward position. Grasp the throttle and rotate it backwards towards you to start the cart moving. The more you turn the throttle, the faster the cart will move.

To turn the cart off, simply push the red button in. The throttle lights should go out, indicating it is off.

Your cart should arrive with a charge. However, please charge it overnight after receiving it.

# **OVERLAND** POWER CARTS

**2008**

The year Overland  
was founded.
